Version 1.0 (06/24/2025)

HOW TO: Reset Coursera Jupyter Notebook Labs

Follow the steps below to reset your Coursera Jupyter Notebook lab to its default state.

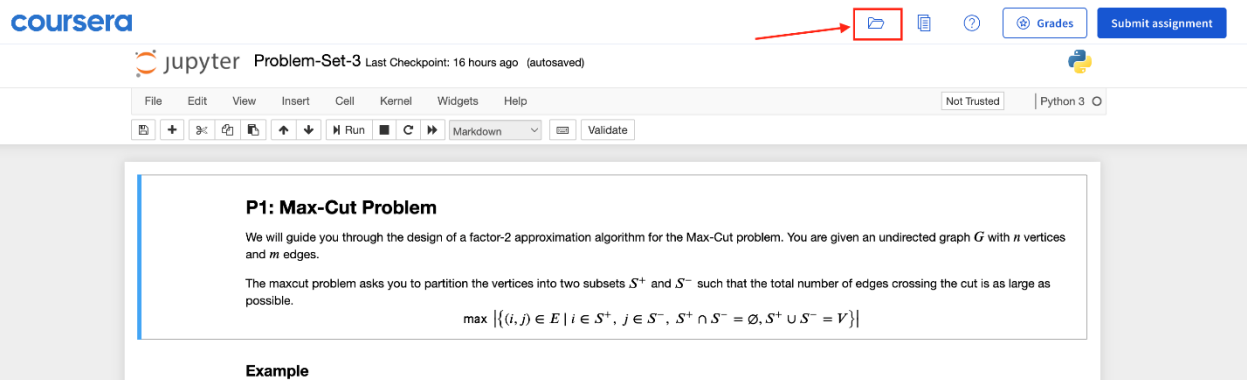

IMPORTANT: Make a local copy of any content you wish to keep before starting the following steps

Step 1: Open the Coursera Lab

Open the Jupyter Notebook lab you want to reset within Coursera.

Step 2: Open the Coursera Folder

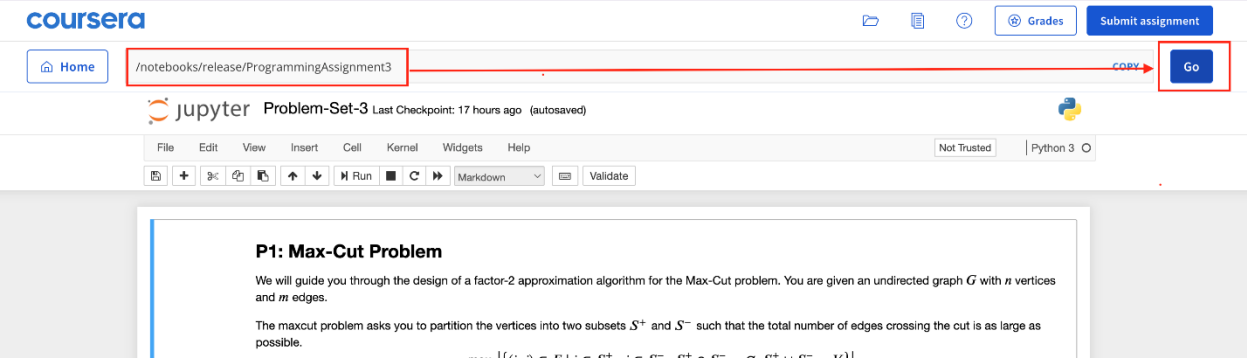

Once you open the assignment notebook, click on the folder icon located at the top of the interface, as highlighted in the image.

Step 3: Navigate to the Parent Directory

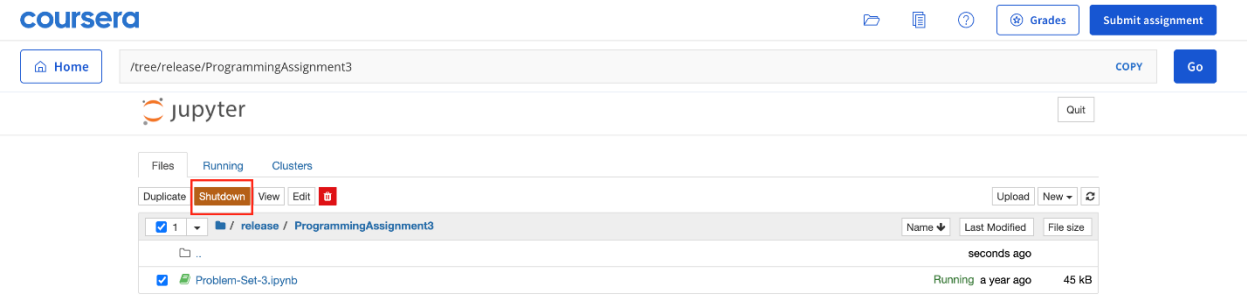

After clicking the folder, you will see the current directory. Navigate to the parent directory (as highlighted in the image) and click the "Go" button.

Version 1.0 (06/24/2025)

Step 3: Shut Down the Lab

If the lab is currently running, ensure it is properly shut down before proceeding.

Step 4: Download the Notebook Locally

Download the notebook file from Coursera and save a copy of it on your local system.

Version 1.0 (06/24/2025)

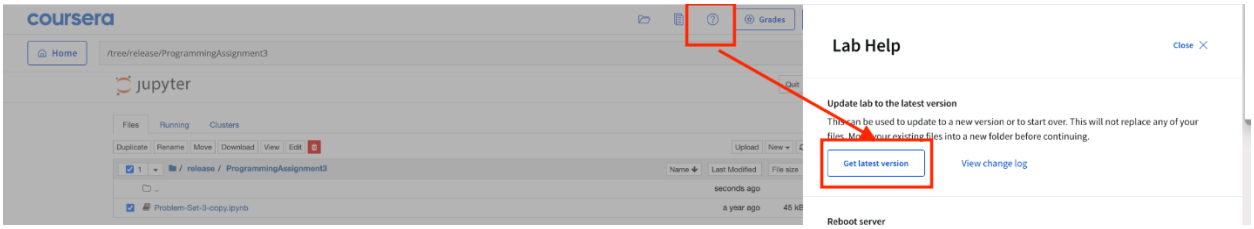

Step 5: Rename the Notebook in Coursera

Rename the notebook within Coursera to a different name. This step ensures you have a locally saved copy while also maintaining a separate version in Coursera.

Step 6: Update to the Latest Version

After renaming the file, go to the "Help" section and update the notebook to the latest version available.

Step 7: Restart the Lab with the New Notebook

You will now have the newly updated notebook file, and you can restart the lab to begin the assignment from scratch.
