Version 1.0 (6/24/2025)

HOW TO: Reset Coursera VS Code Labs

Follow the steps below to reset your Coursera VS Code lab to its default state.

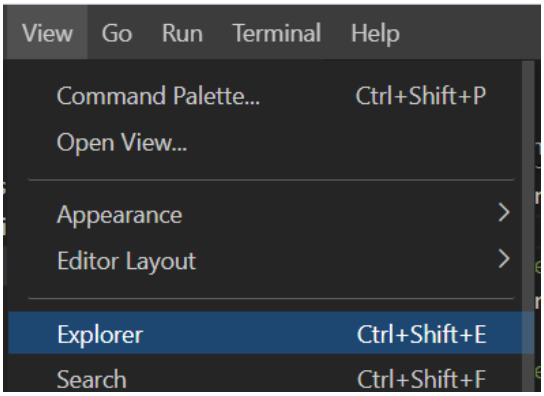

IMPORTANT: Make a local copy of any content you wish to keep before starting the following steps

Step 1: Open the Coursera Lab

Open the VS Code lab you want to reset within Coursera.

Step 2: Open VS Code Explorer View

Once the lab is loaded, open the VS Code Explorer view.

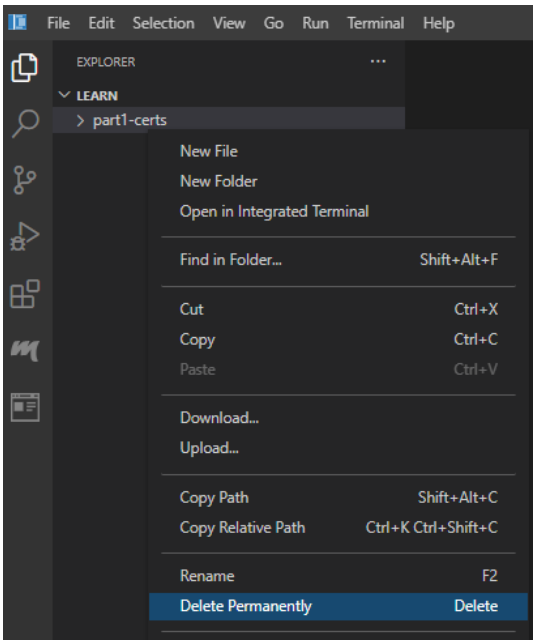

Step 3: Delete the Current Content

Delete all folders and files **under** the LEARN folder. **DO NOT** delete the LEARN folder.

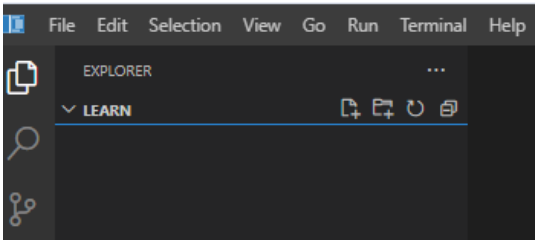

Note: The files and folders present under LEARN may differ by lab and the following image showing ‘part1-certs’ is just one example of this.

Version 1.0 (6/24/2025)

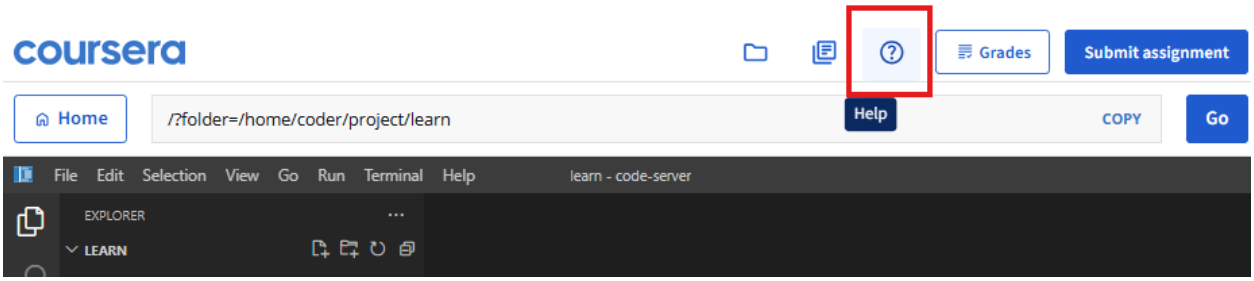

Step 4: Confirm Content Deletion

Confirm that you now have an empty LEARN folder.

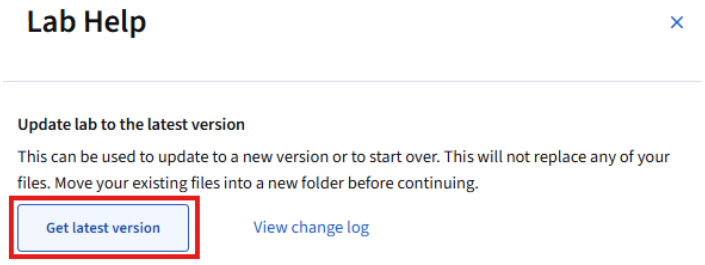

Step 5: Open Coursera Lab Help

Open the Coursera Lab Help view by clicking the (?) button in the Coursera header.

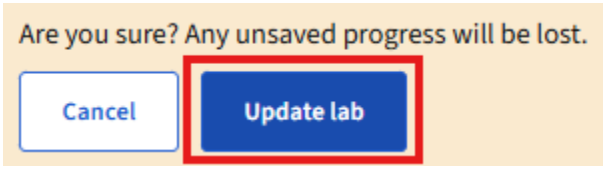

Step 6: Get Latest Version

You should now see the Lab Help view. Click 'Get latest version'

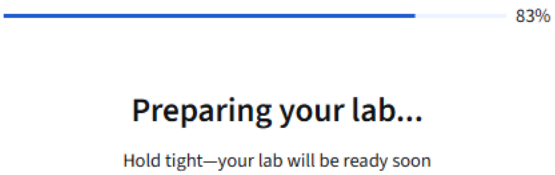

Step 7: Confirm Lab Update

You should see a confirmation prompt. Make sure you have made local copies of any content you wish to keep. Click 'Update lab'.

Step 7: Reload Lab

The lab should then reset and reload.

Step 8: Continue with Lab

The lab should now be reset to the original version. You can now continue with your work.
